Q: How do I add new objects to my array inside a loop? I am trying to populate my array by reading from a text file into it, but I am running into a hurdle. I have 6 sub-arrayList that are all named "ItemList": ItemList, ItemList1, ItemList2, ItemList3, ItemList4 and ItemList5. What I want to do is iterate through the six of them, and read from a text file to populate them. The problem I am having is that instead of adding the new ItemList, ItemList1, ItemList2, ItemList3, ItemList4 and ItemList5 to the array, they overwrite each other. Here is my code: public void loadItems() { String[] labels = new String[]

{ "ItemList", "ItemList1", "ItemList2", "ItemList3", "ItemList4", "ItemList5" }; String[] descriptions = new String[] { "Notes", "Notes 1", "Notes 2", "Notes 3", "Notes 4", "Notes 5" }; String[] values = new String[] { "1", "2", "3", "4", "5", "6" }; ArrayList arrayList = new ArrayList(); ArrayList items = new ArrayList(); 3e33713323
