Possible Duplicate: How to cut a 3 foot cable? I have to remove a long ethernet cable from my wall, usually (most of the time) using a Phillips screwdriver and a bit of effort. Is there any product that I could use to safely open the cable? (I have not been able to find any, and some products claim to be safe, but I would like to be sure.) And this might be a stupid question, but what would be the best way to undo the crimp connectors? Is it just labor intensive? Or do I need a crimp tool? A: The only crimp tool I use is a tweezer because crimp tools are more expensive and they don't help at all. I use my pliers as a crimp tool. There are two little "claws" on my pliers that

are perfect for crimping. I grab the wire with them and pinch it closed. It has been 20+ years of using these. Your pliers will allow you to slide the wire up and down through the pliers and squeeze to take it back down.
