New Fantasy Action RPG | Move | PlayStation®4 NEW FANTASY ACTION RPG (Japanese:

新ファンタジーアクションRPG) is a Japanese visual novel developed by FromSoftware, inspired by the 1986 film Akira. The player explores the theme of youth rebellion and the individual's duty to society through role-playing game mechanics. The game is set in a futuristic cyberpunk city where robots and humans are coexisting. The protagonist, who is neither, is a T-rex-like machine-like being named Arkslan. Arkslan begins the game making a journey in order to fulfill his "destiny" to protect the city from the exiled God known as "Nocturn". Along the way, Arkslan meets other individuals who play a role in Arkslan's life. The game has a mix of visual novel and strategy gameplay with many side quests and decisions that will give different results. In order to progress in the story, the player must choose what to talk to whom and who to persuade to join Arkslan or fight against him. The player must also choose how to deal with enemies and whether to talk with them in order to gain new information or fight them in order to advance the plot. KEY FEATURES: * Multiple choices will affect the game in a different way. *There is no difficulty setting, making the game easy for players to start and difficult to finish. *In-game calendar is used to show what each character wants, and allows the user to set and view dates. *There are several ways to make progress through the story, and they have different starting orders. In addition, when you choose to continue, it will take you to a different order based on how you finished the story. *This title will be available in both English and Japanese.
