It is a science fiction perspective on feudal Japan, where supernatural powers are called “Actions” and each action has its own code. Select your character and role, and set out on a journey to become the strongest player in the group. CrossCode has a great soundtrack that consists of various music and voice over. The graphics and overall visuals of the game are pretty impressive as well as well the sound effects. The gameplay of the game is similar to Dynasty Warriors, however CrossCode is more a strategy game than a real-time battle game. About The Company Zeboyd Games is a small development studio based out of Vancouver, Canada. The founders, Byron and Glados, met in high school and decided to build their own studio after graduating from Simon Fraser

University. About The Game You have to choose what kind of character you want to be within this choose your CrossCode character. You are then able to choose from 9 different characters to pick which is going to be your main character. You are also able to pick 2 companions that will be in the game with you that are going to help you throughout your journey. The game gives you access to a friendcode, so you will be able to find out who your friends are as you venture throughout the game. The game is like one of those story and turn based strategy games, like Final Fantasy Tactics. You can choose your main character, then as you play through the game, the characters will change. Each time you play through the game it will give you access to different battles to perform within each of the characters. Each battle in CrossCode: The battles in CrossCode have a very different approach to the gameplay. Instead of running around as you would in a real-time game, the battles in CrossCode have you play the characters

from the story of the game. What it is, is each character is going to have its own set of stats and abilities that you have to use. When you go to use one of the characters and a battle appears, the battle scene is going to be set in the story of the game. You will then be able to perform actions within your character to help out during the battle. When you perform an action during a battle, then it will lower and upgrade your character stats as well as improve your character abilities. Each of the characters have their own set of abilities that are going to be on the bottom row of the screen. The higher the characters are on the screen, then

4" scale Review When I was posted to Exeter in 1963, my father arranged that I'd start in the Royal Navy, so I joined my first Sea Cadet Unit in January 1964. At the end of this period I continued on to the Royal Signals and went to Bury to be trained there. Afterwards I joined the Signals in Somerset. While I was at the Depot on Headquarters Parade in Weston-super-Mare, I remember taking a group of amateur models to the train and being most impressed at their understanding of the aerodynamics of aircraft and how this was translated into their work. I remember being quite stunned by it! I returned to work with the Depot and it was over a year later, in early 1965, that I first came across the Flying Tiger in a book, Jim Tully's Models. I'll never forget the excitement that the photos of the first Japanese Tiger Moths really had, with their yellow & black stripes and cream'monkey' mascot on the nose. A few weeks later I had a writing set and my taster for modelling came when the RN displayed a Tiger, in my opinion, most beautifully made and I can still remember how I received a mini photo-etch set (Harry Pidgeon was also involved with this event). There was a free tome included with the set, on 'The Tiger in History and Literature', which proved very insightful and full of biographical material on the Chinese and Japanese forces, as well as contemporary accounts. No more Lest we forget... When I joined her Majesty's Marines in 1972, my rather shambolic collection of

that era managed to escape with my honour, the sole civilian addition being this pre-war Tiger. It accompanied its cousin, a female, Dinky Tiger, in the 1970s, on moving to "Amerika", as the USA called the 'Land of the Free' and it lingered over there alongside her until the new millennium when it made its way home again. I was most pleased to have it in the family's new house in Orcombe and finally have joined the other three Tigers that heave around on our shelves today. On the day it arrived, I came into the living room to find it perched on the only armchair and our son, "Dibbles" was sitting where the top part of the beaver came off. My first reaction was an intake of breath! The other three Tigers are still in the garage...
