AutoCAD LT is the predecessor to AutoCAD. Unlike AutoCAD, AutoCAD LT was sold by third parties and licensed under the Autodesk OEM Software License. It was designed to work on the early pre-IBM PC XT and IBM PC XT compatible computers such as the PC XT, PC AT, and the Japanese PC XT. It also supported drawing on "smart cards" (modems) through a second-generation modem, the Microsoft 1200/2400 Series. AutoCAD LT was discontinued in 1993. On May 5, 2013, Autodesk announced the discontinuation of AutoCAD 2013 and AutoCAD LT 2013. The company will continue to support the software for up to one year from the release date, while it will provide its AutoCAD 2014 users with a free upgrade. The AutoCAD desktop app uses the AutoCAD LT architecture to run on the Microsoft Windows operating system (formerly Windows NT/2000/XP), macOS, and Linux (using a Linux kernel). History AutoCAD LT AutoCAD LT (Autodesk LT, or the "Light Table" model) was released as the first major release of AutoCAD in March 1994. One month earlier in February 1994, the company announced the first beta version of the successor to AutoCAD, AutoCAD LT. The Windows client was initially available in the form of a stand-alone program for $750. In its most recent release, AutoCAD LT was discontinued on May 5, 2013. The goal of AutoCAD LT was to be an easy-to-use, affordable CAD program for the personal computer. In fact, the abbreviation, LIGHT refers to the program's ease of use. The original target market was CAD users who did not want to learn the command-line interface associated with AutoCAD. This purpose could be accomplished by providing easy access to the familiar graphical interface. AutoCAD LT is not a true CAD program; it is instead an application that provides access to the same command-line interface as AutoCAD. The first version of AutoCAD LT was basically a clone of AutoCAD, the system that was already in use on the mainframe computers. This allowed AutoCAD LT to be sold on those platforms without any problems. The first two months of sales brought a total of $4 million in revenue, enough to make the program profitable. Auto
