A Free and Simple To Use App for Your Photo-Saving Needs. ) P/Savages Verified Account for 11 years.Q: How to Change Site.css in Shared Hosting? I have a friend who does not have permission to SSH into his site. He had me create a css backup in case anything went wrong with his project. My friend used Site.css to change the background color and font size of some of his pages and I had to download and FTP it into my host directory to get it working. I know FTP isn't the best option, but is there a way to do it in command line? Thanks. A: If the site is a classic ASP site (lets assume it is) then it is still under IIS so the answer would be IIS settings or.net configuration. Assuming that the classic asp site was on port 80, and assuming that the site has a database running on port 1433 6d1f23a050
